

VERY VITAL INFORMATION ON OET SPEAKING:

Be relaxed. Maintain a constant speed and you need to be clear with your conversation with the client. Use your given time fully to think and try to note down your points and then start to converse.

Be polite and don't offend by saying negatively, instead explain them indirectly, for example: by saying you need to improve in your hygiene practice. Be patient, and listen to the patient without any hesitation.

Smile at the interlocutor, especially as you greet the 'patient'. Starting the role play is difficult for some people. If this is the case, start with something like: 'Hello, I'm Anna. I'm one of the community nurses. How can I help you?' (the role play card will guide you as to your role.)

General Tip:

Try to speak English as often as you can...it is the only way you can progress and improve on grammar and sentence structure. And it helps you gain confidence also. Confidence in structuring a complete sentence and talking with someone freely without hesitation ...can only come through practice. So practice as much as you can.

OET Practice Online

OETPRACTICE.NET provides [OET Practice Online](#) for Nurses, Doctors, Dentists, Pharmacists, and Physiotherapists individually. Our OET practice online tests make you confident for your OET exam and get prepared for it from the comfort of your home.

Our experts will make your each and every query with a more clear understanding, we have technical support, tutor assistance, conduct mock tests and giving unlimited access.

Choose your profession and register to train yourself according to your requirements.
